Education

Secondary School
2nd Year | Sohag, Egypt

Skills

- HTML5, CSS3, JavaScript
- React.js
- Responsive Design
- Git, GitHub, Vercel
- Python Scripting
- Linux / Termux
- Nmap & Network Scanning
- Router Hardening
- DNS (Cloudflare)
- OpenSSL & Cryptography
- Static Malware Analysis

Languages

- Arabic (Native)
- English (Intermediate)

Professional Summary

Self-taught Full-Stack Web Developer with hands-on experience in network security assessment, secure web development, and Python-based security tooling. Committed to secure coding practices and continuous learning through practical projects.

Projects

Personal Portfolio Website HTML, CSS, JS, Vercel

- Designed and deployed a responsive, dark-themed portfolio with custom CSS animations.
- Implemented Open Graph meta tags to improve link previews and shareability.
- Deployed via Vercel with GitHub-based continuous deployment.

Network Security Audit & Hardening Nmap, Router Config

- Audited a home ADSL2+ network and identified critical exposures, including TR-069 and Telnet.
- Hardened router configurations (disabled unnecessary services, enforced WPA2-PSK), reducing the attack surface.

Python Static Malware Analyzer Python

- Developed a tool that extracts file hashes and IOCs without executing samples.
- Implemented file entropy calculation to help flag packed or obfuscated files.

Career Objective

Seeking a junior web development or cybersecurity internship to apply my skills on real-world projects and grow under experienced mentors.
